Who we are?

- IEST is a **non-profit research** and development organization, with perfect legal personality, engaged in applied research and technical service and Non-governmental organisations – **independent from political or commercial interest.**
- Our activities are linked to **technical and scientific aspects** that will allow humanity to evolve and to grow within the **limits of our planet.**
- The **earth** is our **spaceship**, so however there is spare, and if it fails we can not repair it, we must learn to respect, in its delicate mechanisms.
- IEST is fully compliant with European regulations - Regulation (EU) No 651/2014 THE COMMISSION - and **defined as a body for research and dissemination of knowledge, thus able to manage research, development and innovation.**

European Institute for Technological Development

Research

We search for new solutions, to solve problems, has been the added value that has enabled man sapiens to evolve towards the Sapiens-Sapiens.

So we believe that the world is a fine place and worth fighting for it.

A. Einstein

Economy

IEST explores and offers a variety of concepts in a changing economy, not only the principles of classical economics, but especially the new concepts of sharing economy, green economy, blue economy

The most 'precious things in life are not the ones you buy with money.

A. Einstein

Society

Lifestyle is the term that is given to describe the behavior adopted by an individual, a group, a nation or a community of nations and co-create characteristics of a civilization or culture in a given space and time.

Peace can not be kept by force, it can only be achieved by understanding.

A. Einstein.

Environment

Nature-based solutions (NBS) refer to the management and sustainable use of nature to address social and environmental challenges.

The important thing is not to stop questioning.

A. Einstein.

Climate-KIC

INNOVATION FOR CLIMATE ACTION

Climate-KIC is a European knowledge and innovation community, working towards a prosperous, inclusive, climate-resilient society founded on a circular, zero-carbon economy.

We are selected as **Pioneers for Italy** and available for hosting international Phd students and thesis.

The FAB SPACE LAB is the hub of an innovation network with international universities for which you can have access to a wide range of data, to develop new digital applications and work in the field of satellite technologies.

FAB
SPACE 2.0

European Institute for **Technological Development**

Innovation hub

- What is that?
 - A coworking space
 - An accelerator of ideas
 - A business incubator.
 - A space to learn to do business
- In which sector?
 - In the field of «Sustainable Development»
- What is Sustainable Development?
 - Any idea, action, business that saves resources.

TOOB

Think Out Of the Box

In collaboration with

iXitaly
Foster the excellence

*Ideas that often seem
small, but
can change the world.*

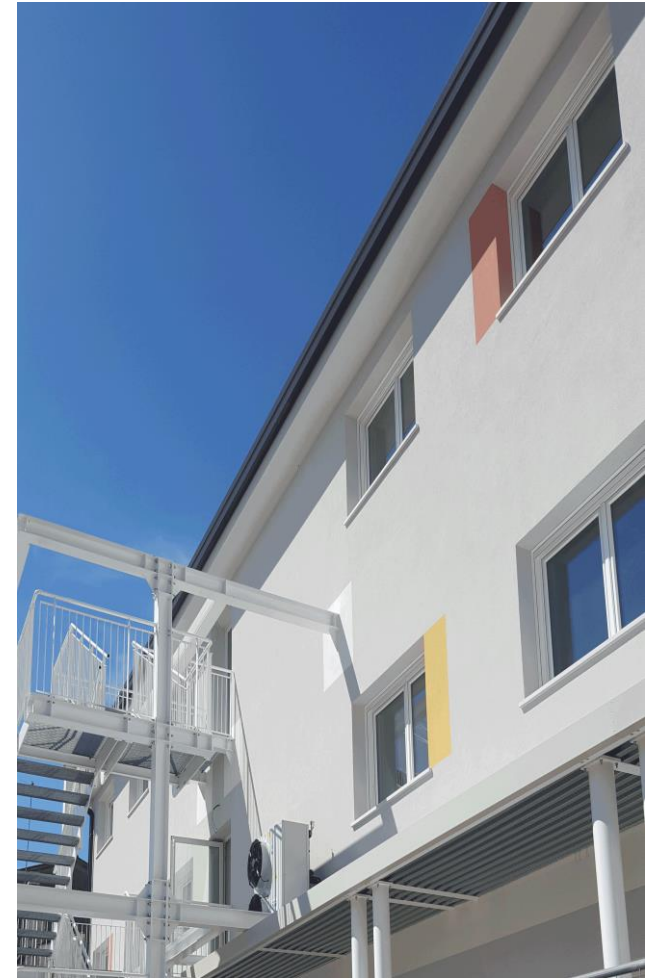

What we could offer?

IEST is based 25 Km far from Venice Italy in A4 – Near Zero Emission – building, fully equipped.

IEST can offer an open-air laboratory of 18 square kilometers, with different types of biotopes: countryside, river, sea, rural areas, small city, mountains and forests.

IEST can involve: citizens, local public administrations, schools, researchers, companies and start-ups.

Our proposal

We are interested on working in the following issues:

- Sustainable Development
- Nature Base Solution
- Development of rural areas
- Circular economy
- Green, blue and low carbon economy

We are also close to one of the most affected areas in the Alps, due to climate change, which in October 2018 caused the collapse of entire forests.

Thanks for your attention
